## The Formation of the Xiang Yu Government

SHIBATA Noboru

This study reconsiders the formation process of the Xiang Yu Government. Contrary to the commonly-accepted theory, Chu Huaiwang (Yidi) in fact had a strong influence on the Chu Government. Xiang Yu subdivided warring states by constructing the feudal system, thereby intending to confine the Yidi Government in a subdivided state. Nevertheless, the feudal system instituted by the Xiang Yu Government collapsed after a short period, the collapse being caused by the dissolution of the Government's military basis.
