

GEOSCIENCE REPORTS OF SHIZUOKA UNIVERSITY

47

-
- Personal history and publication list of Professor Yuichi Morishita
Hiroyuki KIMURA [3]
- Wave run-up on the Ohya discharge channel, Shizuoka, during the passage of Typhoon 19 (Hagibis)
on October 12, 2019.
Akihisa KITAMURA 1
- Recent studies of Fe-K edge XANES analyses on volcanic glasses
Hidemi ISHIBASHI 5
- Geological examination of the “Seorido no Watashi” in the Miho Peninsula, Shizuoka, central Japan.
Sota OKAZAKI and Akihisa KITAMURA 15
- Activity of the Itoigawa-Shizuoka Tectonic Line recorded on the Lower Pleistocene Enrei Formation
in the northern side of the Suwa Basin, North Fossa Magna, central Japan.
Ken-ichi KANO and Akira MIYASAKA 23
- An attempt to detect mass movement associated with large volcanic eruptions (VEI 4 or higher)
using satellite gravity data
Yuta MITSUI and Shun KONAGAI 51
- Detection of multiple slow events in shallow parts of the Nankai Trough based on seafloor displacement
data and Markov Chain Monte Carlo method
Ryoya IGASHIMA and Yuta MITSUI 59
-

July 2020

Institute of Geosciences, Shizuoka University
836 Ohya, Surugaku, Shizuoka, 422-8529 Japan
