GEOSCIENCE REPORTS OF SHIZUOKA UNIVERSITY

45

-
- Tsunami deposits from the coastal lowland of Kawazu, Southeastern Izu Peninsula, Japan
Akihisa KITAMURA, Yuta MITSUI, Hidemi ISHIBASHI and Hideki MORI 1
- AMS ¹⁴C datings of molluscan shells and coral skeletons from deep-sea bottom off Tokai region,
central Japan *Takami NOBUHARA, Ayumi OHTAKA, Yuki TOKUDA and Ken IKEHARA* 17
- Early-Middle Pleistocene tectonics of the central and southern Shinshu districts, central Japan,
based on the stratigraphical and structural correlations between the Enrei Formation
and its coeval strata *Ken-ichi KANO and Akira MIYASAKA* 23
- The effects of temperature on decompression-driven crystallization and eruption dynamics
of mafic magma: A case study of the 1986 basaltic andesite melt
from Izu-Oshima volcano, Japan *Hidemi ISHIBASHI and Ryoya OIDA* 55
- Reliability of melt viscosity scale examined by thermodynamic simulation
of crystallization differentiation: A preliminary result
Hidemi ISHIBASHI and Ryuto SUZUKI 67
-

July 2018

Shizuoka University, Institute of Geosciences
