Research on Settlement Center and Enhancement under Covid-19: How to Turn Motivation into Mechanism

YAMAMOTO Takanori

This paper is a study of the Settlement Center in Japan under COVID-19. First, we are considering changes in the operating rules of the settlement center. While it is a center specializing in Dowa issues, there is a process in which its character fades. Based on the results of the questionnaire survey conducted on settlement centers nationwide and the results of the survey on Shizuoka and Hyogo prefectures, the issues and prospects of settlement work are clarified. In particular, the methodology for changing the motivation of the staff of the settlement center into a mechanism is clarified with reference to advanced cases.
