ボックス理論における日本語再帰代名詞の分析

An Analysis of Japanese Reflexives in the Box Theory

KOMACHI Masayuki

This paper roughly sketches how Japanese reflexive pronouns such as *zibun*, *kare-zisin*, and *zibun-zisin* are analyzed in the box theory proposed by Chomsky (2023). Since little is yet known about the box theory, the analysis in this paper would contribute to clarifying the points to be considered. In the specific analysis, we take over the operator view of *zibun* by Katada (1993), which focusing on the value of phi-features.
