Material: An analysis of images from
Velislavová Bible and teaching material

FUJII Masao, SUGITA Nozomi, MORI Maika, KOBAYASHI Mio

„*Velislavová Bible*” is a medieval illuminated Bible in the 14th century. It was produced by a lay studio. It has been said that a canon of St. Vitus cathedral, Velislav ordered it. It has the colorful images about the farming tools, arms, clothes using in the medieval society. We attempt an analysis of these images and classify them in order to make a teaching material. Additionally, we present a lesson plan for high school world history class.
